HOME PLANTING HEADQUARTERS FOR THE NATION

Dear Friends:

The above picture shows our family engaged in our favorite indoor sport: popping and eating popcorn. That's Eddie on the left, with his mother, and in front of me are Annette and Karen. We're really proud of our nice family—and they're certainly growing up, too!

All of us here at the Seed House want to sincerely thank you for the nice orders you've sent us this past year. We wouldn't last a day without you . . . and we want you to know we appreciate your business and are going to do our best to continue to merit your confidence.

Be sure to read about the special free premiums on pages 35 and 38, and include your choice on your order. These premiums actually increase the value of your order by 20% . . . at no additional cost to you. They are our way of saying "Thank you," and I'm sure you'll agree they are gifts you won't want to pass up.

Incidentally, you'll find complete planting instructions with every order you receive: books that tell how to prepare, plant and cultivate vegetable and flower gardens, how to care for lawns, and complete, easy-to-follow directions for planting bulbs, trees, roses, berries, etc. These books are free with your order, and you'll find them most helpful.

Again, thanks for your orders. We appreciate the trust you've placed in us, and are looking forward to serving you again. On behalf of all of us, I wish you a happy and prosperous 1958.

Sincerely,

Edward May

GERMAYTREETED AND TRIPLE TESTED

The ideal combination for Vegetable Garden Success!

Our Garden Seed program is designed with one thought in mind: to bring our customers the finest seeds we can. We've developed two important steps toward that end:

First, **TRIPLE-TESTING.** Earl May garden seeds are tested in our laboratories, where trained experts test for purity and germination, using scientifically-designed equipment. Next, they're tested in our 76-Acre Test Gardens, where both new and old established strains and varieties are grown, measured, weighed and accurate records are kept as to length of maturity, reactions to climate, productivity, characteristics. Then, the vegetables themselves are tested on our tables: our families pass on flavor and texture. The varieties that rank high in these tests are offered for sale to our customers.

The second part of our program is the **GerMAY-treeted** process; a scientific treatment that protects seeds against destructive soil-borne organisms. It promotes better germination under adverse soil and weather conditions. The GerMAY-treeted process is transparent . . . does not change the color of the seed. No poisonous metallic compounds are used in the process. Tests have proved GerMAYtreeted is entirely non-toxic.

We have marked the GerMAYtreeted vegetables on the following pages. Look for the GerMAY-treeted symbol: another example of our continuing research to bring you better things for yard and garden.

30 ONIONS TO THE BUSHEL!

We thought a bushel of 41 onions weighing 50 lbs. was a good record . . . until George Mumby of Peck, Michigan sent a picture of 30 onions overflowing a bushel basket . . . and weighing 51 pounds! Both records came from our Yellow Sweet Spanish plants, and thousands of our customers get sensational yields each year. But order early—they must be planted early to make the big size.

Easy to plant. Easy to grow. And they make tremendous yields of big, mild, sweet onions.

Once you've seen and eaten fine big onions grown from plants, you'll always plant them. Light frosts and freezes, even a light snow, won't hurt them. So, you can put them out extra early to get a full growing season. Plant 4 inches apart, or plant thicker if you plan to thin for early green onions. We have the two best-by-test varieties: WHITE BERMUDA, the mildest you've ever eaten, and YELLOW SWEET SPANISH, a wonderfully mild onion that keeps for months! Both must be planted early if you want the most and best for your money. So, order early. We'll ship at the right time.

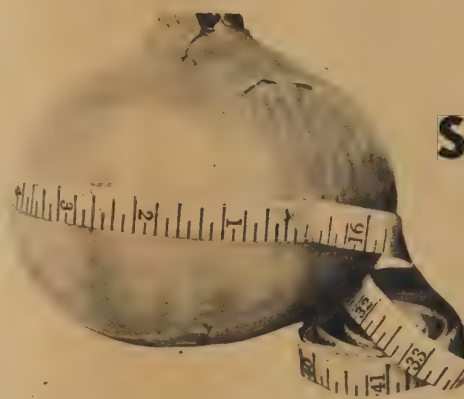

Hybrid

SWEET SPANISH

530. Big and yellow, these genuine F-1 Hybrid Onions weigh over 2 lbs each. Plants start quicker, grow more vigorously, mature 10 days to 2 weeks' earlier than standard Yellow Spanish. Mild, it keeps better and grows bigger. We just completed a three-year testing program, checking 21 newly developed Hybrids. We picked Hybrid Sweet Spanish on the basis of yield and over-all performance.

Bunch, 79c; 2 Bunches, \$1.49; 10 Bunches, \$4.50, Postpaid.

(Approximately 100 plants per bunch depending on size of plants)

The Clean, Easy Way To Plant Potatoes

This Year, Plant SEED POTATO "EYES"

From Genuine Certified Seed

The greatest improvement since seed potato certification! It's no longer necessary to handle heavy potato sacks . . . or bother with cutting the potatoes up. We've saved you this labor by cutting the fertile eye from fresh, clean, Certified Northern Grown Seed Potatoes. They're light (so you pay no shipping charges on heavy potatoes), perfectly clean, and all ready to plant.

Our customers are reporting perfect results with these easy-to-plant eyes. (Clifford Junge of Keystone, Iowa, says the eyes produced as much or more than he got from "cut-up" potatoes, and the quality was really good). Last year we harvested 138 pounds (almost 2-1/3 bushels) of cobbles from 100 eyes.

We guarantee delivery in perfect planting condition (but we can't guarantee we'll have enough to go around, so order early).

Choose from these
three favorites:

- 16. Early Ohio
- 17. Red Pontiac
- 18. Cobbler

**Frank H. Wegener,
Robinson, Kansas, says:**

"You always get a good stand with Maygold. I started with 2 bushels in 1942, and this year I planted 38 bushels of Maygold. It has been doing a very good job for me. It always shells out good . . . in fact, last year it shelled out 250 bushels more than we estimated in a 3,200 bushel crib!"

**Francis Seid,
Auburn, Nebraska, says:**

"I've planted Maygold ever since I started farming in 1942 . . . it really does the job for me. I'm through experimenting with different corns! I bought 2 bushels of another brand last year, and I figure it cost me 20 bushels to the acre for 16 acres . . . or about 320 bushels of corn!"

**Melvin Tally,
Skidmore, Missouri, says:**

"If there's a chance of a crop at all, you'll get it with Maygold. I've used Maygold for 15 years and plant an average of 200 acres of corn. I've found Maygold's grading is perfect . . . much better than other corns. It plants a perfect stand every time!"

BLOOD FLESHED CHERRY PLUM

6825. A wonderful Cherry Plum for all the northern states of the Great Plains. Will be loaded with fruit the second year and often bears first year. The fruit has a dark purple, glossy skin and rich, purplish red flesh with juice literally dripping from it. It's a free-stone, about an inch in diameter, with a small pit. For eating fresh, sauce, jelly and for heavy bearing, nothing equals this one.

Selected 3 to 4 ft. Size

Each \$1.75; 3 for \$4.75, Postpaid

Thrifty "PLUM ORCHARD" Collection

The Plum is our hardiest, most dependable fruit. But remember, plums like company of their own kind. They need company, too, because it is cross pollenization that makes great yields. Every twig becomes loaded, the branches bend with the weight. That's the result of planting several varieties, including a good pollinizer. We have selected 3 of the finest and one of them (Toka) is the extra pollinizer you need. Plant them and have lots of luscious, juicy fruit.

Skin is smooth and firm enough to provide excellent handling, the flesh is crisp and juicy. Flavor milder than Jonathan, does not get mealy toward end of the storage season. Plant MAYPARK Lawn Seed

MAYPARK is a balanced blend of permanent, perennial grasses: some quick-starting, fast-growing to protect other tender shoots, others selected to thrive on low-fertility soil. MAYPARK contains over 50% pure Kentucky Blue Grass by weight, as recommended by Iowa State College. Since Blue Grass seeds are small, the actual seed count in Maypark is approximately 67% Kentucky Blue Grass, 27% Highland Bent Grass, and 3% each of Creeping Red Fescue and Perennial Rye Grass.

And Maypark is GERMAYTREETED, with a special seed treatment which protects the seed and tender shoots during the cool, damp days of early spring when seeds grow best.

You can't buy better lawn seed at any price!
